

# Fonts on PageSurfers and Click'n'Gos

A number of schools have asked me about this so I thought I would put the topic in the newsletter for everyone to see.

It seems that when opening up some of the new Cool and Trendy Page Surfer templates or bringing in some of the Click'n'Go quick reads there appear to be fonts missing. Well, there kind of **are** fonts missing. You have them, but you haven't installed them. They are AYT YearTech fonts that are included on your YearTech installation CD.

But how do you know which fonts are on which PageSurfer layout or Click'n'Go design so you can install them?

Go and grab your PageSurfer book and open it to the design you have chosen. Look down at the bottom of that page and you will see some copy that says "YearTech Only." That paragraph will tell you what AYT YearTech fonts you need to install to make that particular template work. Then all you have to do is install that font from the YearTech installation disk and you should be all set.

If you can't find your PageSurfer book and are in a real hurry, you can go to your YearTrack website, click the link on the right for "YearTech Help FAQ" and then click the "Questions About Using YearTech" link. Down at the bottom of the page is a PDF file you can download that will tell you which fonts need to be loaded to make both PageSurfer and Click'n'Golook their best. Of course you are free to change the fonts and not use the AYT fonts they were set up with but realize you may have to do some work to get your fonts to fit the right way. □

## NAME OF POLL

Question asked to students that the poll is answering. Question asked to students that the poll is answering.

53% Answer number one to the question asked above. Answer number one to the question asked above.

29% Answer number one to the question asked above. Answer number one to the question asked above.

18% Answer number one to the question asked above. Answer number one to the question asked above.

To show you what we mean, the Click'n'Go infographic 2 is above with the font it needs, uninstalled. Below you see how great it looks once we install AYT Albert.
